

## **In solidarity with Ukraine**

The WiseEuropa Foundation strongly condemns the Russian invasion of Ukraine. We are against unjustified aggression against the sovereign European country that violates the fundamental principles of international cooperation. We are wholehearted with our Ukrainian Friends, the society of Ukraine, and all the people suffering from this war.

This is the time when everyone who respects freedom, human rights, and democracy stands up for these values. WiseEuropa, as an independent think-tank specializing in European and economic policy, declares its readiness to cooperate with Ukrainian partners in the area of our expertise and experience.

We would like to thank our partners from Poland, Europe, and the world who are involved in activities with us. We would also like to thank and support our entire team, which in many ways, also individually, helps people affected by the brutal attack on independent Ukraine. We support all those around the world, including Russia, who are loudly protesting against this senseless war.

It is also the time when we see that unity, solidarity, and cohesion are priceless. Long-term, constructive international cooperation, especially at the European Union level, is of key importance for Ukraine and Poland. Building a resilient, zero-emission, and diversified energy system, developing critical infrastructure, or facilitating the labor market are just some of the topics where agreement is needed.

Ukraine, we are with you!

Maciej Bukowski  
President of the Management Board of WiseEuropa

Katarzyna Zwolak  
Managing Director of WiseEuropa
